OF THE EXTERNAL WORLD.
BY PROF. S. B. BRITTON, M.D.

At length this original work, so anxiously looked for, is published.

For 15 years the author has been employed in researches, which at length resulted in the production of this extraordinary book, covering the wide range of vital and Mental Phenomena, as exhibited in MAN and the Animal World. It is, however, especially devoted to MAN—the the constitution and immortal existence of the Soul; its present Relations to the Body; to the external forms and internal principles in Nature, and to the realm of Universal Intelligence. Although treating on the profoundest of subjects, the work is written in an elegant and attractive style to interest the common mind.

At the same time, the student of Vital Chemistry, Physiology, and Medicine; the Divine and the Moralist; the Metaphysical Philosopher and the Political Reformer, will find it replete with profound and profitable instruction.

Finding what are the practical workings of

PRESIDENT LINCOLNS POLICY.

The most important and timely book of the season, which should be CIRCULATED EVERYWHERE.

THE STANDARD WORK ON EMANCIPATION.

MANY THOUSANDS have already been sold and the demand is still increasing.

Read the following letter from the first statement of the County, testifying to its importance:

From the Standard Work.

It is the first work which, by confronting the partial statements which contradictory conclusions have been drawn by adverse parties, has given a new proof that Emancipation is the only true and only safe policy for the slaves.

Its most remarkable part is the *scripture* of Emancipation to Christianity, in an era when its power is supposed to be on the wane.

Its most interesting part is its judgment by events of the progress of idleness, vagrancy and social misery with which the slaveholding interest has alienated the value of reason and religion.

This places *Emancipation* on its true ground of industrial necessity, to enable the owners of land to pay wages to the freed negro—not to compensate the owner for the loss of property, but to relieve the society from the entire pressure of taxation.
